| <b>120V LIGHTING &amp; UTILITY OUTLETS</b>                                                                                                                                                                                                                                                                                                                                                                                                           |                       |                       |              |       | Convention Technical Services (CTS) is not responsible for voltage fluctuation or power failure due to temporary conditions including but not limited to losses due to utility company failure, permanent power distribution failure, power failure caused by vandalism, faulty exhibitor equipment or overloads caused by exhibitor. For your protection you should install a surge protector on your computer(s). All electrical installations and connections to all electrical service should be made by a CTS technician. CTS will not be responsible for any damage or loss to any equipment component, computer hardware or software, and/or any damage or injury to any person caused by the installation, connection, or plugging in of any electrical outlet by persons other than a CTS technician.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Sample Layouts

**Island Booth: Electrical layouts are required for all island booths.**

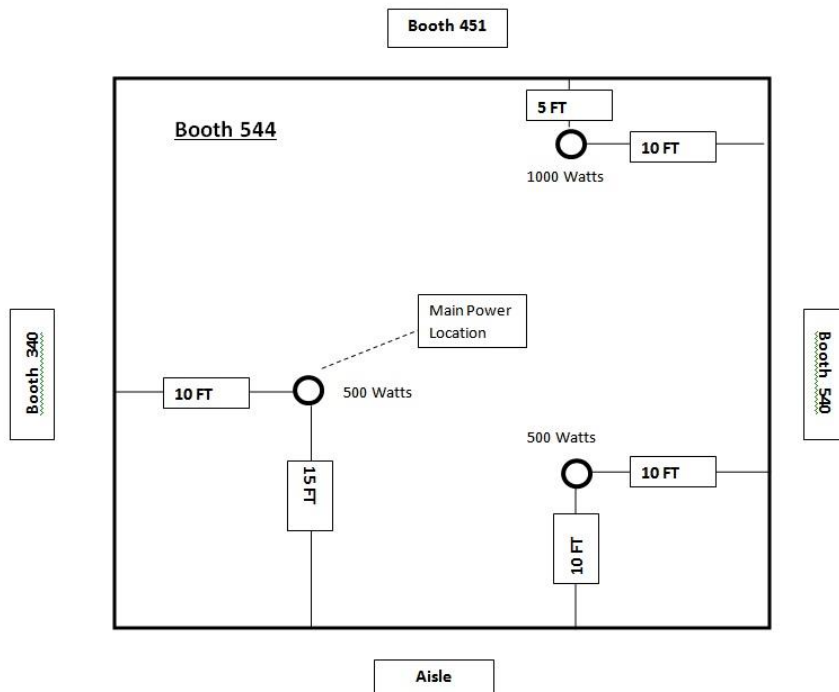

### Standard Location:

There is no such thing as a standard location in an island booth. There will be labor and material required to install the outlet ordered. If a layout is not provided, we will place power at our discretion.

### What should be on a completed floor plan:

1. Main drop or outlet location. Island booths do not have a back wall so the main location operates as the point which all other power will be distributed from. There can often be many cords or cables in this location so it is often best to be in a closet, under a table or a location out of site.
2. Location of all other outlets. This includes the dimensions where the outlets will be placed. Without dimensions, outlets are likely to end up in the wrong locations in the booth.
3. Power requirements in each location. This can be 500 Watts / 1000 Watts / 2000 Watts or even 10 Amp 208 volt 3 Phase
4. Booth Orientation. This is especially useful for island booths. It helps us understand which side is which in the booth.

### Completed Layout:

**Inline or Peninsula Booths:**

Layouts are only required when outlets are needed at any other location than the back of the booth.

Standard Location:

In Line

Completed Layout:

Thank you for your business!
